OBSERVATION INFORMATION

| Species       | Date(s) Observed | Spawning | Rearing | Present | Anadromous                          |
|---------------|------------------|----------|---------|---------|-------------------------------------|
| Coho Salmon   | 8/9/2002         |          | Yes     |         | <input checked="" type="checkbox"/> |
| Rainbow Trout | 8/9/2002         |          | Yes     |         | <input type="checkbox"/>            |
|               |                  |          |         |         | <input type="checkbox"/>            |
|               |                  |          |         |         | <input type="checkbox"/>            |
|               |                  |          |         |         | <input type="checkbox"/>            |

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

Eight coho juveniles caught in two baited minnow traps after 6 hours soak time. Traps placed at 62.13689N Latx 149.93807 Lon, at two 4-ft culverts at the eastern end of Anaconda Ave. (See attached map and photographs).
